May 2015 - Present (7 years)

Rangam Consultants Inc.
Sr. SQL Developer
May 2015 - Present (7 years)
Vadodara, Gujarat

HRTP was a Staffing Solution Application Which used for US Recruitment. It
was the old system working since 2005, now the new version is developed,
that name is SourcePros system developed in MVC and Framework 4.
For the back-end, a SourcePros system Database is developed with best

normalization concepts in SQL server 2014 Enterprise. And finally, HRTP
DB successfully migration is done to with a newly designed Database. DB
Migration whole process is completed within a year.

This process includes following steps:

• Gathering and analyzing the new and undeveloped requirements.

• DFD and UML Design

• Designing the best normalization database structure

• SQL Script is written

• Test db migration on the staging server

• finally, the Migration Process run on Production

• Verify the report's summary with newly migrated data
